

Chicken Health 3: Disease Diagnosis & Treatment

Clinical Signs, Pathology, and Veterinary Intervention

CHAPTER 1: DIAGNOSTIC PROTOCOLS

Systematic post-mortem analysis, tissue sampling, and field-level symptom recognition.

CHAPTER 2: RESPONSIBLE MEDICATION USE

Managing withdrawal periods, avoiding antibiotic resistance, and selecting flock treatments.

Disease Category	Common Symptoms	Primary Treatment
Bacterial (CRD)	Coughing, nasal discharge, facial edema	Targeted Antibiotics / Tylosin
Viral (Newcastle)	Nervous signs, green diarrhea, high mortality	Supportive therapy & Stricter Biosecurity
Parasitic (Coccidiosis)	Bloody droppings, lethargy, huddling	Anticoccidials / Amprolium
