

Feed & Nutrition 1: Essential Nutritional Requirements

Proteins, Energy, Minerals, and Vitamins for Optimal Growth

CHAPTER 1: AVIAN DIGESTIVE PHYSIOLOGY

How chickens process feed from crop digestion to nutrient absorption in the small intestine.

CHAPTER 2: KEY NUTRIENT BALANCES

Balancing essential amino acids like Lysine and Methionine for maximum genetic expression.

Nutrient Type	Primary Source	Biological Function
Crude Protein	Soybean meal, Fish meal	Muscle development and egg production
Metabolizable Energy	Maize, Wheat, Sorghum	Body maintenance and metabolic heat
Calcium & Phosphorus	Limestone, Bone meal, DCP	Bone strength and eggshell formation
