

Farm Management 3: Layer & Broiler Production Systems

Specialized Operations for Meat and Egg Farming

CHAPTER 1: LAYER PHASE MANAGEMENT

Managing the pullet-to-layer transition, lighting programs, and peak egg production curves.

CHAPTER 2: BROILER BATCH TURNAROUND

Optimizing growth rates, flock uniformity, and harvest logistics.

Production System	Key Advantages	Critical Focus Area
Deep Litter System	Lower initial capital outlay	Litter moisture & parasite control
Battery Cage System	Higher stocking density & clean eggs	Caloric intake & bone strength
Free Range / Pastured	Premium market positioning	Biosecurity & predator defense
